Tentative:

CD3: 0% liab

NID: 0-100% liab for dmg to rear of CV3 and front of IV, if DD hit rear of CV3 and was then hit in the rear and pushed back into CV3 then NID is 50-100% liab for dmg to front of IV and rear of CV3, if not then would be 0% liab for loss. If NID partially liab, no sub for ded.

CD2: 100% liab for dmg to rear of IV, 50-100% liab for dmg to front of IV and rear of CV3, pending order of impacts. Per CD3 second impact more severe than first.

Sub Category:

RCF CD3, ver FOL, expl liab pends investigation, expl appears comparative with each party bearing some neg for CV3 rear, expl if 2nd impact more severe than first then each party would owe for some of CV3 rear, if DD states was pushed into the CV3 then may need to fall back on PR as well for liab, she u/s. Set up FI. P/C to DD, lmtcb. P/C to NI, # in file not valid, sent contact ltr. P/C to CD2, s/w Amber, lmtcb.

CD3 FOL:

CD3 said she felt 2 distinct impacts at TOL, 2nd impact was more severe than that first. It was raining and traffic was coming up to an accident so CD3 slowed for traffic when she was hit in the rear. She felt 1st impact and then almost immed felt 2nd impact. No wit at the scene. PD did come to scene and cited CD3 for no insurance card but she provided proof of insurance and that was dismissed. Unknown if
